Digital Literacy Project Report(CSE0001)

Name : Ayush Agarwal
Registration Number :25BCE10986
Branch :B.Tech CSE(Core)
Year : 1st Year
Course : Digital Literacy(CSE0001)

Introduction :

This project was undertaken as part of the Digital Literacy course with the objective of developing essential skills required to effectively navigate the digital world. As a Student Digital Ambassador, the project focused on creating awareness about digital literacy, building a professional online presence, and understanding safe and responsible digital practices.

The tasks involved designing an infographic, creating professional profiles on key platforms, exploring coding and collaboration tools, practicing email etiquette, and studying cybercrime scenarios. Through this project, I gained practical exposure to various digital tools and platforms, while also improving my understanding of online communication, data safety, and professional digital behavior.

Overall, the project helped in building a strong foundation for academic and professional growth in a digital environment.

Task -01 (Info Graphic) :

For this task, I created a digital literacy awareness infographic using Canva. The infographic was designed as a one-page visual resource to help explain the concept of digital literacy and its importance, especially for students. It included key topics such as safe internet practices, maintaining a professional online presence, and using digital tools effectively for

learning. The main objective was to present the information in a way that is both visually engaging and easy for my peers to understand.

While designing the infographic, I focused on using a clean layout, simple icons, and a balanced color scheme to highlight important points clearly. One of the main challenges I faced was selecting the most relevant information and presenting it concisely without making the design look cluttered. Overcoming this challenge helped me improve my ability to communicate ideas effectively through visuals.

Overall, I found this task both creative and insightful, as it combined design thinking with structured content. It also gave me a better understanding of how visual communication can be used as a powerful tool to promote digital literacy.

Task -02 (Digital Portfolio) :

In this task, I created and updated my profiles on GitHub, LinkedIn, and Kaggle to establish a professional digital presence. GitHub was used to showcase my coding-related activities and to create a profile README highlighting my academic background and interests. LinkedIn was used to present my educational details and connect with a professional network. Kaggle was chosen to explore data science concepts and datasets.

Each platform serves a unique purpose: GitHub is useful for project development and version control, LinkedIn helps in networking and career opportunities, and Kaggle supports learning in data science and analytics. Over the next four years, I plan to actively use GitHub to build and showcase projects, LinkedIn to connect with professionals and explore internships, and Kaggle to improve my analytical and problem-solving skills. This task helped me understand the importance of maintaining a clean and professional digital identity.

Task 3 – Platforms :

In this task, I explored both coding practice platforms and collaboration tools. For coding practice, I used Codechef and completed a beginner level problem. This helped me understand how coding platforms work and how they can be used to improve problem-solving skills. These platforms provide structured challenges that are useful for building programming logic and preparing for technical interviews.
These platforms are highly useful in an academic context. Coding platforms help in strengthening programming skills, while tools like Google Forms support surveys, quizzes, and collaborative work. This task improved my familiarity with online tools that are essential for both learning and collaboration.
For collaboration, I created a Google Form titled “Digital Literacy Awareness Quiz” consisting of five questions, including multiple-choice and short answer types. I also linked the form to a Google Sheet to collect responses. This activity helped me understand how digital tools can be used for data collection and analysis.

Task 4 – Email Etiquette :

In this task, I practiced writing professional emails and learned the importance of proper communication in a digital environment. I drafted two emails: one requesting an assignment extension from a professor and another expressing interest in a summer internship opportunity. Both emails followed a formal structure with clear subject lines, polite language, and proper formatting.
A common issue in digital communication is the use of informal language or unclear messaging, which can create misunderstandings.For example, an email that lacks a clear subject line or uses an inappropriate tone can easily be ignored or misunderstood. This task helped me understand the importance of clear and professional communication, which is essential in both academic and professional settings.

Task 5 – Cybercrime Awareness :

In this task, I studied UPI-based payment fraud, which is a common cybercrime in India. I learned how fraudsters trick users into approving

payments by sending fake requests or links. One surprising aspect was how easily users can be misled into sharing sensitive information due to lack of awareness.
This task made me more cautious about online transactions and digital security. One habit I will adopt is to always verify payment requests and never share my UPI PIN with anyone. Understanding cyber threats and prevention methods is essential for safe digital usage, and this task helped reinforce responsible online behavior.

Conclusion :

This project provided me with a comprehensive understanding of digital literacy and its real-world applications. Through the different tasks, I developed important skills such as visual communication, building a professional online presence, basic coding, digital collaboration, and maintaining online safety.
The project also emphasized the importance of being responsible in the digital space and communicating effectively in professional environments. It increased my awareness of cybercrime risks and the need to take preventive measures while using digital platforms.
Overall, this experience has boosted my confidence in using digital tools and has prepared me to face future academic and professional challenges in a more informed and responsible manner.
